SUMMARY

Engineering-focused Full Stack Web Developer with 1+ year of hands-on experience specializing in architecting and scaling AI-integrated, production-ready web platforms from early concept to real-world deployment. Demonstrated expertise in embedding intelligent decision-making, automation, and analytics into modern web architectures.

EDUCATION

Chandigarh University
Bachelor of Technology

Uttar Pradesh, India
July 2025 – July 2029

SKILLS

Languages C, JavaScript, TypeScript, Java, SQL, Python, Rust
Frameworks React, Node.js, FireBase, Express, Next.js, RESTful APIs, MCP, Agentic AI, Flutter
Tools Git, Docker, AWS, GCP, n8n
Soft Skills Team Management, Adaptability, Leadership

ACADEMIC & PERSONAL PROJECTS

CivicLedger – *Decentralized Governance Platform* React.js, ICP, Rust

- Architected a platform that transforms government policies into executable smart contracts on the Internet Computer Protocol (ICP), ensuring tamper-proof, automated policy execution.
- Implemented real-time transparency and citizen participation modules with on-chain tracking and community-driven governance decisions.

JanMitra – *AI-Powered Community Assistance Platform* Node.js, FastAPI, Vite 16, React 18

- Built a smart web application helping citizens access government schemes, complaint management, resume analysis, and academic/event tracking in a unified portal.
- Integrated real-time campus navigation via QR scanning and NLP-driven scheme recommendations to improve accessibility and institutional communication.

RoadSense – *Smart Real-Time Road Anomaly & Safety Intelligence* React.js, Next.js, Firebase

- Built a crowd-sourced real-time platform that automatically monitors and maps road infrastructure quality by tapping into standard smartphone sensors (accelerometer, gyroscope, and GPS).
- Processed sensor streams locally using statistical anomaly detection, streamed data to a centralized Supabase database, and delivered an interactive dashboard with real-time hazard mapping, administrative audit controls, and rich analytical insights.

ACHIEVEMENTS

- **Hack with Uttar Pradesh** – 1st Runner-Up, National Hackathon | [Link](#) 2025
Secured 1st Runner-Up at Hack with Uttar Pradesh 2025, a national-level hackathon, by developing an innovative Blockchain & Web3 solution.
- **CU FlowJam 2025** – 1st Runner-Up, Technical Innovation Competition | [Link](#) 2025
Won 1st Runner-Up at CU FlowJam 2025, an intra-department technical competition organized by the School of Computer Science & Engineering, Chandigarh University.
- **Innovate X 2026** – 1st Prize, Intra-Department Project Showcase | [Link](#) 2026
Won 1st Place at Innovate X 2026, an intra-department technical project showcase organized by the School of Computer Science & Engineering, Chandigarh University.

HOBBIES & EXTRA CURRICULAR

Hobbies Listening Music, Playing Mobile Games, Watching Anime series
